

**2.4**

## 2.4mR TRAILERS

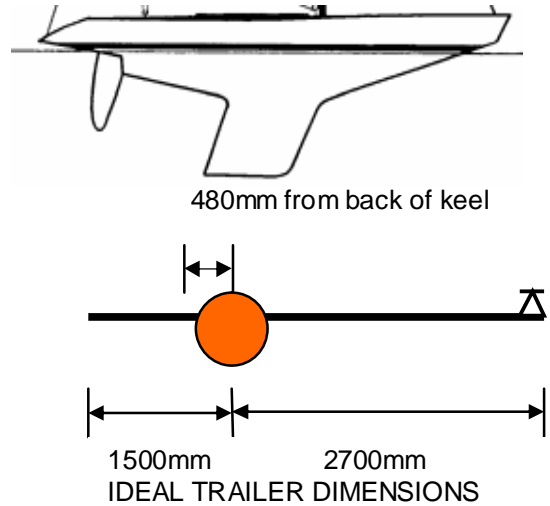

Peter Russell, V1, 2006

**If you can't get your boat to the next regatta – that's not very smart!**

**Please check the trailer regulations in your country before purchase.**

You can always bring along some friends - like the Finnish Team at Eckernförde!

A 6ft x 4 ft box trailer with beach trolley tied in (better with a long drawbar), cost \$850

Jet ski trailer with beach trolley "U" bolted on, cost \$1350 (sail tube and tool box extra)

Purpose built two boat trailer with brakes, cost \$3,000

Purpose built two boat trailer without brakes (check the 750kg limit), cost \$2,500

With some engineering skill (and daring) you can build your own trailer

Barry Coates's trolley on wheels has travelled Australia, cost – a couple of wheels

Tony Ryan's trailer is an engineer's dream, cost \$1,000

Look no trailer (great ute)
