

New South Wales Historic Motoring Association

Check list of requirements of the Classic Vehicle Scheme (CVS)

Pub 18/12/23

When providing access to Conditional registration under the Classic Vehicle Scheme NSWHMA relies on Clubs to know their members and their vehicles. Clubs must require owners to notify them of modifications made to their vehicles. When Clubs stamp the 1835 declaration for registration or renewal of a vehicle under the CVS they must ensure that these requirements are met and all the appropriate documents are supplied to NSWHMA including a copy of the **most recent registration certificate**.

This form is required (**from 1/1/2023**) for both initial and renewing registration. Please print out and complete, including owners details and signature. The registrar then must sign and stamp the form and send it to NSWHMA with the other paperwork.

Owner's Name.....	Owner's Signature.....	Tel
Primary Club		
Make and model	VIN No.	
Build date.....	Registration No.	Engine No.
ECS/VSCCS Engineering Certificate No.		Cert:Date

All appropriate boxes must be ticked to show that the relevant requirements of the CVS scheme have been met.

- ☐ **The owner** is a financial member of the nominated Primary Club. (The owner is referred to as the Vehicle Operator once the vehicle is registered.)
- ☐ **The Primary Club** is affiliated with NSWHMA.
- ☐ **The vehicle** is 30 years old or more, calculated from the month of build.
- ☐ **The vehicle** is less than 3.5 tonne Gross Vehicle Mass (GVM).
- ☐ **The vehicle** is normally garaged in NSW.
- ☐ **The CVS declaration form 1835** is complete and should be less than 42 days old when presented to Service NSW for registration purposes. (Original document required by NSWHMA and SNSW).
- ☐ At initial registration on CVS the declaration is accompanied by a blue slip less than 42 days old complete with identification and design checks. (Copy required by NSWHMA).
- ☐ At renewals the declaration is accompanied by a pink slip less than 6-months old. (Copy required by NSWHMA).
- ☐ **Engineering Certification (ECS or VSCCS)** is provided when necessary (copy required by NSWHMA and by SNSW).

If further modifications are made to a vehicle the Club may require a further blue slip and that may lead to a further VSCCS certification. In that case, copies of both updated documents must be supplied to NSWHMA. After registration the number plate issued must be advised to NSWHMA CVS office.
