

Surface Watch Procedure

The person on Surface Watch should meet the following requirements:

- Have a relevant recreational boat drivers' licence
- Be capable of maintaining a continual lookout while the divers are in the water
- Be able to use the VHF radio with Confidence
- Be familiar with Diver 1 and engine
 - Be able to start and manoeuvre the boat and retrieve divers
- Be able to buoy the anchor line and ditch it over the side
- Be able to assist the first diver back into the boat
- Be able to log divers into and out of the water
- Be able to administer the O2 Kit

It is recommended that a boat handler and a surface watch be on board the boat during a dive that has been nominated as a 'Drift Dive'
